1975:Nov.

Foreword

This publication is one of a monthly series containing data on medical assistance payments made under Title XIX of the Social Security Act (Medicaid). Information is compiled and reported by each State and/or jurisidictional agency administering an approved Title XIX program on Federal Report Form SRS-NCSS-120: Monthly Statistical Report on Medical Care. Currently there are 54 such programs in 49 States, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Arizona has not initiated a Title XIX program and Massachusetts has a separate State agency for blind recipients.

Prior to January 1974, similar data were collected for the midmonth of each quarter and midmonth quarterly reports have been published in this series since May 1967.

Reports for the months of March, June and September will include quarterly summary data and in addition, reports for December will include annual summary data.

Information presented include medical payments by form of payment, payments to medical vendors by type of service, number of recipients in whose behalf medical vendor payments were made, and data related to screening services under the Early and Periodic Screening, Diagnosis and Treatment Program.

This report was prepared by Henrietta Duvall and Annie J. Mayfield, with the assistance of Robert Terrell, National Center for Social Statistics.

Introduction

Medicaid (Title XIX of the Social Security Act) is an assistance program designed to provide medical assistance to specified groups of needy individuals. Such persons are classified into two main groups according to their maintenance assistance status, (1) those who are authorized to receive money payments for their basic necessities under public assistance programs such as Supplemental Security Income and Aid to Families with Dependent Children, and (2) those who are not receiving maintenance assistance payments even though they may, in fact, be eligible. There are extensions of the maintenance assistance status categories but uniform procedures do not exist for reporting such data. There are four basic eligibility requirements for medical assistance: (1) age 65 and over; (2) blindness; (3) permanent and total disability; and (4) membership in families with dependent children. In addition, some States have exercised the option of including other needy persons who do not fall into any of the above categories. Such recipients are classified as 'Other title XIX' recipients in the accompanying tables. Also, 'essential persons' (usually spouses) may also be eligible for medical care. For money payment recipients, these persons are usually classified according to the same eligibility factors as the recipient spouse.

Generally, payments are made out of Medicaid funds to vendors (providers) of medical services, directly or through a fiscal agent as the direct results of claims filed by the provider after services are rendered. Data presented in this publication are generated as an adjunct to the Medicaid claims processing and payment operation. Thus, information is based on bills paid and not services rendered during the month. Consequently, the data provided through this process are not professed to represent a true picture of the incidence of illness among Medicaid eligibles and are subject to fluctuations unrelated to the provision of medical care. Monthly data are collected and presented to meet pressing current demands for minimum information on medical care financed under title XIX. However, States are required to provide more significant and detailed annual data on the numbers of persons receiving medical services, the number of units of such services and the corresponding amounts of payments.

Except for payments, data related to screening services are not necessarily generated through the claims payment process. Numbers of individuals screened are usually based on services actually rendered during the report month. As a result, payments reported for screening services may be unrelated to persons receiving such services.

HIGHLIGHTS

Medical Assistance (Medicaid) Financed Under Title XIX of the Social Security Act - November 1975

Payments made out of Title XIX funds in November totalled $1.144 1/ billion, a decrease of $108 million from October. Average monthly payments for the year ending in November equalled $1.141 billion, an increase of 1.0 percent over the year ending in October.

Approximately 8.6 million recipients 2/ had vendor payments totalling $1.1 billion made in their behalf.

There were concurrently 352,947 medicaid eligibles enrolled in health maintenance organizations whose premiums totalling $12 million were paid out of Title XIX funds.

Persons Served

The percentage distribution of persons for whom medical payments were made by basis of eligibility and money payment status for November is as follows:

Basis of eligibility	Total	Money Payment Status: Money payment authorized	Money Payment Status: Money payment not authorized
		Percent	
Total	100.0	77.2	22.8
Aged 65 and over	23.6	15.0	8.7
Blindness	0.5	0.4	0.1
Permanently and totally disabled	14.1	11.0	3.1
Children under 21 in families	33.0	29.6	3.4
Adults in families with dependent children	22.5	20.9	1.6
Other Title XIX under 21	3.0	xxx	3.0
Other Title XIX age 21-64	3.3	xxx	3.3

1/ Includes total payments of $2,645,651 for Vermont and vendor payments of $2,555,651.

2/ Includes recipient count of 21,000 for Vermont which was furnished by the State. Recipient estimate for Wyoming was based on average payments per recipient from prior months. North Carolina recipient count was inflated to reflect prescribed drugs.

More than half (55.5 percent) of the recipients for whom vendor payments were made were members of families with dependent children. Children under 21 in families and other Title XIX recipients under 21 accounted for 36 percent of recipients. Recipients eligible on the basis of age 65 and over accounted for 23.6 percent of the caseload. Recipients who also received money payments outnumbered nonmoney payment recipients by more than 3 to 1. Among members of families with dependent children under 21, nine out of ten medicaid recipients also received AFDC money payments.

Medical Payments by Groups of Persons Served

As shown below, the distribution of payments differs significantly from the caseload distribution. Payments for persons not receiving maintenance assistance are nearly equal to those for money payment recipients. The single largest proportion of payments (27.6 percent) are made on behalf of recipients aged 65 and older who are not also recipients of maintenance assistance. Such recipients represent only 8.7 percent of the caseload. Payments for these recipients, to a large extent, are made to medical inpatient facilities, which represent the more expensive types of medical services. Only 17.6 percent (about half of the corresponding recipient proportion) of payments are made on behalf of children under 21 years of age. Among the eligibility groups under age 65, the largest proportion of payments (24.2 percent) are made on behalf of the permanently and totally disabled.

Basis of eligibility	Total	Money Payment Status: Money payment authorized	Money Payment Status: Money payment not authorized
		Percent	
Total	100.0	52.4	47.6
Aged 65 and over	38.7	11.0	27.6
Blindness	0.6	0.4	0.2
Permanently and totally disabled	24.2	15.5	8.7
Children under 21 in families	14.8	12.3	2.5
Adults in families with dependent children	15.5	13.4	2.1
Other Title XIX under 21	2.8	xxx	2.8
Other Title XIX age 21-64	3.3	xxx	3.3

Payments by Type of Service

Decreases in payments from October were observed for nearly all services with the exception of intermediate care facilities and home health. The largest dollar decreases were observed for inpatient hospital, skilled nursing home, physicians' services and prescribed drugs. However, the average monthly statistics for the 12 month period ending in November increased for all specified services over October. Inpatient services showed a higher rate of increase (1.1 percent) than outpatient services (0.9 percent). Average monthly increases of more than two percent were observed for outpatient hospital, home health and family planning.

Screening Services

During November a total of 152,387 children were reported as screened under the Early and Periodic Screening, Diagnosis and Treatment Program. Fifty-four percent of the children screened were six years of age and older. About forty-eight percent of children screened had referrable conditions uncovered and ninety-three percent of those with conditions uncovered were referred for diagnosis and/or treatment.

ANNOTATIONS

1. The following definitions apply to symbols appearing in the detailed tables:

   --- indicates no data reported.
   *** indicates that the percent was not computed because the base was too small.
   Z indicates that the percent was less than 0.05.

2. Arizona has no title XIX program and is excluded from the tabulations. Vermont did not submit a report for November and is excluded from the tabulations.

3. Wyoming did not report recipients or payments by maintenance assistance status and basis of eligibility of recipient and is excluded from all applicable tables. Colorado reported recipients and payments by basis of eligibility only. Data by maintenance assistance status for Ohio are incomplete.

4. States do not always report premium or per capita payments into the SSA system for aged and disabled recipients separately, such as Georgia and Maine where payments reported under the aged category include payments for the disabled. There is variance from month to month in States reporting HMO premium payments because in some cases, such payments may be made less frequently than monthly (Table 1).

5. North Carolina recipients for prescribed drugs are not included in the tabulations. Payments for such services are reflected in Table 5 only.

6. Data for New Jersey in Tables 2-14 include the number of children screened under the EPSDT program and payments for such services. Idaho payments include $5,424 for administrative cost paid to Delta Dental.

7. Minnesota and Washington included HMO recipients and premium amounts in the data in Tables 2-14.

8. In addition to Vermont, Colorado, and Wyoming; Massachusetts, Nevada and Pennsylvania are excluded from Tables 10-13 because children and adults in families were not reported separately. Connecticut, Illinois, Kansas, Minnesota, and West Virginia were able to report children and adults separately but were unable to differentiate medical vendor payments between adults and children in families. These States are excluded from the total percentage computation in Table 11. Pennsylvania did

not differentiate other title XIX recipients by age and is excluded from Table 14.

9. For Utah, all adult recipients i.e., aged 65 and over, blind and disabled were reported under money payment not authorized even though some may be SSI recipients.

10. In some States, two or more types of medical services may be grouped together under one class, such as Connecticut where other practitioners', clinic, laboratory and radiological, home health, and family planning services are included in other care, and South Carolina, where skilled nursing facility services include payments to State mental institutions.

11. For some States, differences in vendor payment amounts between Table 3 and Table 5 are due to inclusion of retroactive adjustments which can be reported by type of service (Table 5) but which are not applicable to the recipients reported in Tables 2, 4, and 6-9. For the current month, however, Michigan's expenditures exclude accounting adjustments of $97,576. For Illinois, the difference in payments between Table 1 and Tables 3 and 5 is due to the disallowance of some claims that exceeded time limitation.

Annotations specific for Screening Tables 15-20

12. States omitted from tables either did not report on screening services for November 1975 or there were no individuals screened during the month.

13. California reported 90,281 individuals receiving comprehensive physical examinations in addition to the screening data.

14. Data for Massachusetts, Ohio, Indiana and Colorado are largely estimated and incomplete. For Rhode Island, data include 128 newborns, for whom payments are reflected in physicians' or hospital services. For Massachusetts, data include services for medicaid newborns, foster children, and mentally retarded children enrolled in the State's special schools.

15. Payments for screening services were not reported by Massachusetts, Michigan, and Puerto Rico and payments for Idaho, Illinois, New York, Pennsylvania, and Texas were not reported separately by age.
